<b>Soft Skills:</b>	Problem-solving, Teamwork, Critical thinking, Time management, Active listening, Adaptability, Communication, Flexibility

## EXPERIENCE

---

**ALX Full Stack Software Engineering Program**

*Online*

*Student*

*Feb 2023 - April 2024*

- Gained hands-on experience with Linux system administration
- Grasped knowledge of DevOps using Github and Puppet
- Developed a strong foundation in web development using Python and JavaScript
- Mastered project planning using Trello and also wire-framing

## PROJECTS

---

**Simple Shell**

*Github*

- Collaborated with other ALX SE engineers to develop a shell that imitates the sh shell using the C Programming language
- Successfully executed any command present in the path variable

**Airbnb Clone**

*Github*

- Developed a website that allowed users to find diverse types of accommodation
- Used SQL, Python and HTML to develop the website

**Carlano Quiz App**

*Github*

- Designed a website that enables developers to test their knowledge of various languages
- Developed using DaisyUI, Flask and SQLite DB

**Web portfolio**

*[Online](#)*

- Created a personal website portfolio using UIKit CSS and Flask

## CERTIFICATES

---

**ALX Software Engineering**

*Feb 2023 - April 2024*

- Mastered C and Unix Programming, Python, Data Structures and Algorithms
- Developed a strong foundation in full-stack development using Python and JavaScript

**Postman API Fundamentals Student Expert**

*April 2024*

- Obtained a hands-on certification that teaches how to use Postman to work with APIs
- Gained experience in basic scripting, API authorization and how to integrate APIs in applications
